A Gateway for Life

TII Conference - May, 20, 2015

Context

In South-East Asia, many children still have limited to no access to higher education, and their basic school level education prevent them from escaping poverty.

Lots of private and public efforts have been made to lead children back to school. An increasing number of underprivileged **children can now reach the end of secondary school.**

Further to secondary school, there is a real **lack of qualified training** that effectively allows graduates finding a job. Besides, training programs are expensive and therefore **out of reach for poor people.**

A graduation certificate with **no job** or a very low paid job as a result, that does not enable them to get out of poverty, unfortunately remains the common trend.

Passerelles numériques operates in South East Asia

OUR VISION

Passerelles numériques strives for a world where young underprivileged people can have a better life through access to education, training and employment to better leverage their potential and willpower.

OUR MISSION

We strive to enable access to education, technical and professional training in the digital sector for young underprivileged people by leveraging their leveraging their potential and willpower. We endeavor to truly develop their strong employability which will allow them and their families to escape poverty in a sustainable way, and contribute to the social and economic development of their countries.

OUR OBJECTIVES

Our ambition is to help at least **90% of the students** directly enrolled in our programs to find **a qualified job** and ultimately end the cycle of poverty for themselves as well as their families.

We target at least 50% of girls to join our programs.

Key dates and figures

2005
